The Strength of Simplicity

We design, calculate and manufacture storage systems, going from the most basic to the most sophisticated and advanced solution.

We guarantee the quality of our processes creating reliable products, to satisfy our customers storage needs.

Esnova Racks S.A. Head Office and Manufacturing Plant - 46.600 m²

INNOVATION

Innovation to develop new products and optimizing the existing ones.

EXPERIENCE

We have a team with extensive experience in the logistics and handling industry.

WE EXPORT TO MORE
THAN 30 COUNTRIES

TECHNOLOGY

Our machinery at your disposal.
We are equipped with the most flexible and advanced production systems.

We count on our own laboratory to test the different components of each system, carrying out tests to check load capacities, resistance, buckling, etc.

QUALITY

Quality as a priority standard is established on each and every process Esnova develops.

The group invests in quality and safety and also promotes environmental respect.

- Quality management system certification (ISO 9001).
- Environmental management system certification (ISO 14001).
- Occupational health and safety management system certification (OHSAS 18001).
- CE marking certification acc. UNE EN 1090.
- Member of the European Federation of Material Handling FEM/AEM.

CANTILEVER

- It is a storage system designed for loads which have great volumes or lengths. This type of system is perfect for storing wood strips, boards, tubes of different materials, profiles, etc.
- It can have multiple configurations, depending on the storage necessities, which gives a great warehouse management flexibility:
 - The arrangement of loads could be horizontal or vertical.
 - It can have simple or double structure.
 - It can be used for heavy or light loads.

SYSTEM COMPONENTS

IPN ARM

CANTILEVER RACKING

A shelving designed for supporting **heavy loads** of great lengths or volumes.

Standard dimensions							
Column height CAB medium loads (H*)	2500	3000	3500	4000	4500		
Column height CA large loads (H*)	4000	4500	5000	5500	6000	6500	7000
Arm length (L*)	600	800	1000	1250	1500		

*Dimensions in mm.

LIGHT CANTILEVER

A system for storing **light loads** of great lengths or volumes.

CTA ARM
